PROFESSIONAL SUMMARY

Full-stack developer, AI systems architect, operations leader, and business owner of **Leeway Industries**, serving as head of **Leeway Innovations**. Brings 15+ years of leadership and operational experience building AI-driven platforms, autonomous agent systems, and scalable web applications. Creator of the Agent Lee ecosystem and the LEEWAY Standards framework, combining governance-first engineering, structured execution, and real-world operational leadership.

CORE SKILLS

JavaScript	React
HTML5 / CSS	Node.js
WebRTC	IndexedDB
Multi-agent orchestration	LLM integration
RAG / memory systems	Voice systems
Governance runtime	CI/CD

LEADERSHIP PROFILE

- 15+ years leading teams, operations, logistics, infrastructure execution, and business delivery.
- Built governance-first AI systems aligned to the LeeWay Standards model.
- Combines software delivery, innovation leadership, and real-world operational accountability.

SELECTED PROJECTS

Agent Lee - AI Multi-Agent Operating System

Flagship System

- Designed and built a fully autonomous agent system with orchestration layers, memory pipelines, and governance enforcement.
- Integrated AI models as tools instead of controllers, preserving agent-first execution and auditability.
- Developed real-time voice and interactive UI control surfaces for guided user interaction.

LEEWAY Framework

Governance Architecture

- Created a modular web application framework with embedded AI, standards enforcement, and offline capability.
- Built governance scoring, audit pipelines, and compliance-oriented runtime patterns that demonstrate the LeeWay Standards in practice.

AI-Enhanced Web Applications

Browser AI / Real-Time Systems

- Built React-based applications with voice-enabled assistants, persistent memory, and real-time collaboration workflows.
- Created polished CRM, content, and interactive demo experiences that connect AI capabilities to product value.
- Featured repository evidence includes LeeWay Standards, Agent Lee, LEEWAY-VSCODE, Leeway Runtime Fabric, and LeeWay Edge RTC.

PROFESSIONAL EXPERIENCE

Founder, Business Owner, and Innovation Lead Leeway Industries / Leeway Innovations / RapidWebDevelop / Agent Lee

- Lead business strategy, product direction, and engineering execution across AI systems, client-facing platforms, and operational technology initiatives.
- Head Leeway Innovations while translating the LeeWay Standards into working products, governance patterns, and structured delivery systems.

Operations and Infrastructure Leadership 15+ Years

- Managed teams, logistics workflows, maintenance coordination, and infrastructure execution in demanding environments.
- Improved execution quality, reliability, and efficiency through process design and systems thinking.

KEY ACHIEVEMENTS

- Built a fully self-contained AI agent ecosystem from scratch.
- Designed a governance-first AI architecture with runtime verification.
- Created production-ready systems without relying on a heavy backend stack.

EDUCATION

Bryant & Stratton College
Associate of Applied Science (AAS) - Business
Bayshore Campus, Wisconsin
Graduated August 2019 | GPA 3.8
